It's In Her Kiss
by Dana Hawkins

Adult Romance
Publication: 02/02/2027
Publisher: Storm Publishing
Agent: Jenna Satterthwaite
Rights Sold: World English + Italian (Storm Publishing)

About:

Things I know for certain:

1.Everyone I kiss has an accident within 48 hours.
2.The gorgeous private investigator at my door thinks I'm delusional.
3.I really shouldn't kiss her... even to prove a point.

By day, Eve sells crystals, incense, and hand-poured candles. By night, it's another lonely evening in with the cat. After her exes racked up broken bones, twisted ankles, and one memorable ER visit, she is protecting the
world from her lips. Then, Brooke shows up at her store – all sharp edges in a sea of dreamcatchers, convinced that Eve's "curse" is really insurance fraud. The offer: let Brooke shadow her for thirty days to prove Eve's innocence – or her guilt.
But spending every day with someone who interviews your exes and looks at you like you're a puzzle to solve? That's its own kind of dangerous. Especially when Eve can't stop noticing the way Brooke's expression softens when she thinks no one's watching. Or how good she looks leaning against the shop counter in the morning
light.
Brooke doesn't believe in curses. Eve doesn't believe she deserves love. But when the tension between them becomes impossible to ignore, they'll have to decide: is falling for each other worth the risk?

There's plenty of life left in Adam yet, though sadly the same can't be said of Righteous Brother tribute artist Barry Haddon, whose dead body is discovered by Adam outside a nightclub. Suddenly Adam discovers an exciting new hobby—sleuthing! Is a knife-wielding robber terrorizing the locals responsible for Barry's murder? Despite Mona's best efforts to balance her life and satisfy all the demands upon it, her tenure is threatened, and Mona has to face the decision in front of her. How hard is she willing to fight for the career she earned, especially as the only woman in an all-male department? What is she willing to hang on to and let go of, and at what cost?

Stripped to the Soul
by Jade Marrey

Adult
Publication: 06/23/2026
Publisher: Post Hill Press
Agent: Jenna Satterthwaite

About:

Hiding protects you, but honesty transforms you.

When Jade Marrey stepped into a London club to audition as a stripper, she had no idea
what she was about to embark on—the beauty and the ugliness, the pain and the joy, and the ultimate ripping away of self-protective layers she had spent years building. At times, the journey broke her, but sometimes the most beautiful things are made from those broken pieces.

Through the flashing neon lights of the club, the whispered transactions, and the voyeuristic gaze of strangers, Jade reveals everything she's learned about identity, power, and perception. Weaving together personal experiences of a dancer with transformational teachings on shadow work, feminine energy, and self-empowerment, Marrey's story will resonate with anyone who has ever felt lost, disconnected, or misunderstood.

Stripped to the Soul is a deeply personal memoir and self-help guide that challenges societal expectations and invites readers to embark on a journey of self-discovery. At its core, this book uses the baring of fresh layers as a metaphor for the work to be done at the emotional, psychological, and spiritual level—unveiling the raw, unfiltered truth of who we really are.

This book is for women who crave deep transformation but feel trapped by past wounds, societal expectations, or fear of judgment. Stripped to the Soul offers them permission to step fully into their power, own their stories, and find strength in their vulnerabilities.

About:

In this hilarious, illustrated, middle-grade novel, Hangameh "Harriet" Mansoor faces bullies, bad grades, AND puberty. Will she survive the worst month of her eleven-year-old life?

Eleven-year-old Hangameh "Harriet" Mansoor really needs to catch a break. Puberty gifted her a big nose and bushy eyebrows, which make her stick out even more than being the only Iranian girl among all her blonde, blue-eyed classmates. But the sixth-grade camping trip to Camp Cottontail could be the perfect opportunity to turn her middle-school fate around. She'd finally have a little space from her over-protective parents and moody older sister; she'd have some serious fun with her best friend Cathy; and she'd maybe even gather up the courage to talk to her long-time crush, Jeremy.
Unfortunately, a string of terrible luck threatens everything. Her bully, Sarah Gill, starts to date Jeremy and when she catches a glimpse of Harriet's unshaved legs, she gives Harriet an awful nickname: Hairy Man Suit. But worst of all, her parents announce that money problems might force them to move all the way back to Iran--and soon--sending her far away from her best friend and everything she knows. While Harriet usually tries to blend in as much as possible and keep the peace, she'll have to speak up and stand up if she wants to solve any of these catastrophes. But can she do it before her family packs up everything to leave the country?

Agri-Energy: Growing Power, Growing Food

by Rebekah Pierce

Nonfiction, 276 pages
Publication: 11/20/2025
Publisher: Island Press
Storm Agent: Lisa Amstutz

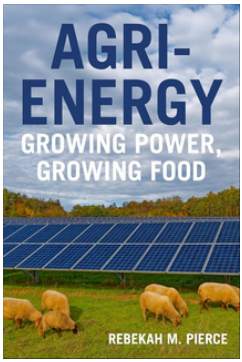
About:

Most people don't think of agriculture when they hear the term "solar farm" or "wind farm." In fact, many fear that renewable energy installations are eating up prime farmland and threatening natural areas. But what if it weren't an either-or proposition? What if wind and solar could go hand-in-hand with environmentally sustainable farming?

In Agri-Energy, Pierce shows how this growing trend not only creates much-needed space for energy production but is an economic lifeline for countless farmers, and provides surprising benefits for livestock, the surrounding ecosystem, and struggling rural communities. If done right, it's a win-win-win for people, power, and the planet.

Pierce gives farmers, developers, environmental activists, and concerned community members the information they need to successfully pair renewable energy and sustainable agriculture. The book addresses legitimate (and manufactured) qualms about the impact of renewable energy production on the natural landscape while illustrating various models of agri-energy. Pierce draws on the first-hand experience of farmers with different acreages, climates, and crops, and in different stages of their careers. She also gets into the weeds about specific approaches that can maximize benefits for all those involved.

Finally, Pierce explores the future of agri-energy, examining the pitfalls and policies that will determine whether this novel union of food and power will continue to grow. The result is a concise but complete primer on a little-understood phenomenon—one with enormous implications for economic, food, and energy security.



Agri-Energy: Growing Power, Growing Food

by Rebekah Pierce

Nonfiction, 276 pages
Publication: 11/20/2025
Publisher: Island Press
Storm Agent: Lisa Amstutz

Praise:

"Rebekah Pierce shares a grounded, deeply personal, and practical roadmap for family farms to thrive by getting more out of the same resources by producing energy that supports agriculture. Her story-rich with real-world examples-shows that America's agricultural heritage and a clean and abundant energy future can not only coexist but support one another."
-- L. Michelle Moore, CEO, Groundswell and author of "Rural Renaissance"

"Agri-Energy is a deep dive into the many layers of connection between farming and energy, exploring the opportunities that solar and wind can provide farmers for a stable income, access to land, and additional ways to farm within their community. By co-locating agriculture and energy, farmers can offer vegetation management services, fire suppression, and increased soil health, while also helping to strengthen and expand domestic production of lamb, wool, honey, fiber, and energy - all products currently being imported into the United States. Anyone interested in this new and innovative approach to farming should read Agri-Energy."
-- Stacie Peterson, Executive Director, American Solar Grazing Association

"Pierce has put her finger on a rural revolution that promises to help farmers stay on the land while meeting the nation's need for food and renewable energy. She is a gifted writer who makes a compelling case why we can do both."
-- Paul Gipe, renewable energy analyst and author of "Wind Energy for the Rest of Us" and "Wind Energy Basics"

MaryAnning and Paleontology for Kids

by Stephanie Bearce

Middle Grade Nonfiction, 134 pages Publication: 05/14/2024
Publisher: Chicago Review Press
Storm Agent: Heather Cashman

About:

Mary Anning was only 12 years old when she excavated the skeleton of an unknown animal. The discovery of the ichthyosaur was the dawn of a new age of science called paleontology, and Anning became one of the leading experts in the study of dinosaurs. Her discoveries helped lay the groundwork for Charles Darwin's theory of evolution and changed the way scientists understood the past.

Unfortunately, as a woman of the 1800s, Anning received almost no

recognition for her contributions, which were instead credited to the male naturalists who had purchased her specimens.

Author Stephanie Bearce brings Anning's remarkable work to life for young readers with research and projects that allow children to experience hands-on science as Anning did. Kids will create fossil models in plaster and use tools to extract them, build a Mesozoic diorama of a dinosaur habitat, grow crystals in an eggshell to observe how geodes are formed, and much more!

Praise:

"Mary Anning and Paleontology for Kids by Stephanie Bearce provides an in-depth and fascinating look at the life and amazing discoveries of Mary Anning, which not only helped create the new scientific field of paleontology but challenged long-held beliefs and theories about the natural world. Budding paleontologists will also enjoy the 21 hands-on experiments and thought-provoking activities included in this well-researched and engaging book." —Linda Skeers, author of Dinosaur Lady
